To Whom It May Concern:

Since 1996, Hannibal Regional Healthcare System has contracted design-build and construction management services from Murray Company for multiple renovation and new construction projects on our 100 acre campus, and we are looking forward to continuing this professional relationship.

During our recently completed project, the Phase I Addition and Renovation, included a new 37,000 square foot Emergency Department, Interventional Cath Lab, and Critical Decision Unit, plus a 65,000 square foot three-story Medical Office Building, Murray Company continued their track record of performing high quality work while maintaining their standards of reliability, honesty, and ethics. The success of this multi-phased project was the direct result of a collaborative effort between Hannibal Regional Healthcare System, Murray Company, the design team, and local subcontractors and suppliers.

This Phase I Addition and Renovation project added approximately 102,000 square feet of new clinical and medical office building space for a total design and construction cost of approximately \$24 million dollars. The total time from the beginning of planning through design, construction, and move-in was approximately twenty-six months.

I would recommend Murray Company for any project you are currently considering, and I am available to speak with you concerning their qualifications.

Sincerely,

Doug Ruble
Vice President of Facilities
Hannibal Regional Healthcare System
